"To Have And To Hold"

Visit "[To Have And To Hold](#)" on MotoLyrics.com

You and I know that we need each other
It came to me as I drove through the pouring rain
There's something I've always known that I need to tell
you
It's the simple things I find so hard to say

So I give you my heart
And all the feelings inside
Here's a love that will last
for the rest of our lives
So believe in these words
That are deep from my soul
And remember that I'll always be there
To have and to hold

When you're away I find that I need you
And then it turns out
You feel the same
Now I won't be alone to face tomorrow
And the truth is out and it's falling just like rain

Chorus
