### "Steps For Hell"

In the rhythm of pain pulsation  
In the visions that is unknown  
In the temptation that is fatal  
In the mystery of dance on the verge of ruin

Steps for Hell  
Life with length is nothing  
Absorption of infernal manna  
Unholy extract of faith

In the spontaneous act of the permanent suicide  
In the insensible affect and impassive desire  
In the furious fear and obedient rapture  
In the black bile intoxication

Steps for Hell  
Fucking time only increases a black seed  
For the fruitful horizons of flesh  
On the way to satanic revelation

All in all are in the constellation of Sin  
Inexorable thirst  
Of black hole of poisonous consciousness  
Steps for Hell  
For the great beyond

Cosmos of soul conceals the Evil intent  
Descending to demonic origin
