I've been away  
There must be something in the air that has called me  
to stay  
I'm over  
The cloudy feeling that I had to get out of the rain  
This summer  
It doesn't matter whatever calls out my name  
I'm ready  
Are you ready cause after this we'll never be the same  
Getting ready to ride on the wind  
Do you believe we'll ever feel this again  
Chorus:  
I want your weight upon me  
Don't want to be lost and lonely  
I want to wake to find a world we belong in  
Lay all your hair around me then act surprised that you  
found me  
I'm always going but I don't know when  
I'm on the phone  
I hear you breathing and I'm off in a world of my own  
For so long,  
So many reasons, hard to discern where the hell I'm  
going  
I'm rolling  
A steady rythm, keeping the pace with a song  
Oh woman  
Am I dreaming, or are you as real as the cloud I'm on  
Getting ready to ride on the wind  
Do you believe we'll ever feel this again  
Chorus  
  
Oh fall was on and you were gone  
So much for summer days  
Yeah but the letters come and every one repeats what I  
used to say  
Chorus
