"Everything We Need"

Visit "[Everything We Need](#)" on MotoLyrics.com

In my life everything has a time
Every river running over was one day dry
On a day like this honey how can we ever miss
We've got everything we need right now
If we don't try loving we'll never know
Then we'd have nothing at all
We could end up looking all over the world
For what is right here in our yard
In my life everything has a time
Every river running over was one day dry
On a day like this honey how can we ever miss
We've got everything we need right now
There are so many places to go
But there's something to hanging around
If you could lay right here what a lovely thing
I know the sun would never come down
In my life everything has a time
Every river running over was one day dry
On a day like this honey how can we ever miss
We've got everything we need right now
Well I act so tough but I'm not tough really
When I look on love well I'm just afraid as any
I want you here and I love this feeling
Never been so near to all this love
In my life everything has a time
Every river running over was one day dry
On a day like this honey how can we ever miss
We've got everything we need right now
In my life everything has a time
Every river running over was one day dry
On a day like this can I have a little kiss
Then I'll have everything I need
Yeah we'll have everything we need
Yead we've got everything we need yeah
