Every couple of days I recall what you mean to me
Close my eyes and I do float away
Friends like you don't fade in time
We just change the way we will,
And love each other still
And share the things that only time will tell
Every couple of days I yearn for the sun to shine
Lay on that grass with my head on the ground
Days like these, they ease my mind
Let us just remain at peace and lie here in this place
And dream of all the road that we could take
Chorus:

Every rain cloud isn't there just to fall
There are mountains unlike mountains at all
And our friendship, well it's much more than it seems
Let us take it, Let us dream
It's been a couple of years
Now I don't get to see you often
Feel your wind and I know you're around
So much love has saved my heart
I love you every way
It's good to watch you change
There's some of every season in your ways
And no amount of time
No distance down the line
Could ever take away the love that's in your eyes
Or the gentle way you always look at mine
Every couple of days I recall what you mean to me
Close my eyes and I do float away
Friends like you don't change with time
We just change the way we will
And love each other still
And share the things that only time will tell
Chorus
We are every rain cloud
Over every mountain
We are every season
And we have every reason
