Tell me what you will my blue winged friend  
Did you hear me from where you drifted on the wind?  
This autumn wind on a summer day  
Sure can turn a blue sky grey  
Oh it's a lonely day and cold  
There are secrets you've not told  
And there are parts of me that I have never known  
And I wonder if you see through the walls inside of me  
Feathered friend I wish that you could say  
Why you sit on that wooden post and watch me play  
The sky is yours and the ground is mine  
Do you want to trade some time?  
And let me soar above these trees  
See the earth through golden leaves  
Breathe the air and watch the rivers from above  
There are many things to love  
But it's these that call it to me  
If I run like the river runs  
If I fall like water falls  
Oh if I breathe like the wind  
Will I ever learn it all?  
If I change like autumn leaves  
If I grow like summer weeds  
If I'm quiet as snow  
Will I ever know it all, learn it all?  
I don't really know from day to day  
If I'm willing to walk this road or turn away  
But something here in the silver sky  
Is exactly what I need  
To begin the song again  
Help me sing my winged friend  
With the melody you rise and float away  
Then I'll leave the way I came  
But I'll never be the same  
Repeat chorus
