Call my name, Call my name  
Say the things that angels say  
I get along right now  
But I know there's more somehow  
'Cause I feel her in my dreams  
And I lie awake wondering  
She's got a lover's touch  
And she makes me feel so much  
When she really speaks to me  
I can tell it's more than a dream  
Chorus:  
Well then love come take me  
Lead me there as you will  
Draw me like spring does flowers  
Awakening on a hill  
Show me how to breathe in colors  
Lay my cares to the wind  
You're painting me a world in wonder  
I'll never forget again  
I get around just fine  
There's an angel on my mind  
She's a mystery to me  
Brings me so much more to believe  
Bring me love, for a start  
Show me how to free this heart  
When you really speak to me  
I can tell it's more than a dream  
Chorus  
Getting closer, now she's gone again  
I think I hear her  
I dream at night in the wind  
Call my name, call my name  
Say the things that angels say  
Seek me out, seek me out  
Find me waiting and awake
