I don't know why you couldn't see

The damage that you've done to me

Now it's too late for you to retry

Yeah im over it

I don't want you back

I did all that i could do

This here was not enough for you

Now after all you've put me through

I won't be running back to you

All you had to do is try

I give my best but you kissed it all goodbye

Now you sit and wonder why

All you had to do is try

You turn me into someone else

I didn't recognize myself

Cos i let u take control of me

Forgot about, who i wanna be

I did all that i could do

This here, is not enough for you

Now after all you put me through

I won't be running back to you

All you had to do is try

I give my best but you kissed it all goodbye

Now you sit and wonder why

All you had to do is try

And all you had to do is try

I give my best but you kissed it all goodbye

Now you sit and wonder why

All you had to do is try

And all you had to do is try

I give my best but you kissed it all goodbye

And now you sit and wonder why

All you had do is try

(You have to try, oh yeah)
