### "Failed State"

Visit "[Failed State](#)" on MotoLyrics.com

We get torn apart  
All our lives  
Told that we're useless or gifted  
Loved or despised  
Too many generations passed  
And passing  
But all their progress  
Lost it's meaning  
We call it evolution  
You call it a crime  
But as we run  
From your culture  
You're running out of time

Self immolation?  
Just to keep you warm tonight  
(Passing through)  
How far could this world go  
To reject you

I - will not fall in line  
I - will not break in time  
We can rebuild this,  
Beyond  
All our lives
