Yeah, yeah, hey, hey, hey what do you say?
I've got you, it's brand new day
Ain't nothin' gonna bring me down

And if we stick together like Crazy Glue
As long as you've got me, baby I've got you
There's no stoppin' us now

And when it's dark, when it's cold
When you're scared and alone
I'll be there by your side
And that's all you need to know

These are the reasons that we love
And baby, my love you can be sure of
I got your back when the odds are stacked
Against us you will see, this is a promise that I make
You can always count on me, you can always count on
me

Yeah, relax if we get off track
I'll take the wheel and steer us back
I'm lookin' out for you, yeah

And even when we don't see eye to eye
We can still share piece of the big blue sky
That's what best friends do

And when you're down, when you're out
Call my name, scream it out
I'll be there, don't forget
That's what friendship's all about

These are the reasons that we love
And baby, my love you can be sure of
I got your back when the odds are stacked
Against us you will see, this is a promise that I make
You can always count on me, you can always count on
me, yeah

'Cause you make me smile and you make me laugh

I will catch your fall when you need a hand
You won't ever have to wait, let's go, yeah

These are the reasons that we love
Baby, my love you can be sure of
I got your back, when the odds are stacked
Against us you will see, this is a promise that I make
You can always count on me

These are the reasons that we love
Baby, my love you can be sure of
I got your back, when the odds are stacked
Against us you will see, this is a promise that I make
You can always count on me, you can always count on
me
You can always count on me, you can always count on
me

These are the reasons we love, yeah
These are the reasons, yeah
My love you can be sure of, baby
