The day after all this is over.  
I'll miss you when i go.  
I hate to think you are surrounded.  
By people who won't let you go.

So if and when  
if and when  
if and when the world should end I love you  
i love you

The sun comes up, if you just wait dear.  
You can't get there on your own.  
I hate to think that you not paid attention.  
To this thing you should have known.

So if and when  
if and when  
if and when the world should end i love you  
i love you...
