Written by dennis deyoung
Lead vocals by james young

Every day I get the feeling
When you move on down the street
Wondering when I'll be your lover
And you'll make my dream complete

The way you walk is so inviting
That I quiver and I shake
The way you move it makes me wonder
How much more can I take

I'm gonna make you feel it
Basically that's what I say
I'm gonna make you feel it
Cause you want it just that way

Every time that we're together
My head starts to rock and roll
I get this strange electric feeling
That I simply can't control

I'm gonna make you feel it
Basically that's what I say
I'm gonna make you feel it
Cause you want it just that way

[guitar solo]

I'm gonna make you feel it
I'm gonna make you feel it
I'm gonna make you feel it
