

Styx "Number One"

Visit "[Number One](#)" on MotoLyrics.com

You can't be still
You're such a nervous fellow
Like a yo yo
Up and down
You take this little pill
And life will be so mellow
You'll feel the world
Start slowing down around

Who's that rushing out the door?
Who's not taking any more?
Who's been down this road before
Without you?
You tell me who's number one?
Who's not here?
Who's having fun?
Who's the one who cares so much
About you?

You won't feel the pain
You won't mind the rain
You can be happy all the time
All the time
One dose twice a day
The world will go away
You'll be smiling through
The worst of times

Who's that rushing out the door?
Who's not taking any more?
Who's been down this road before
Without you?
You tell me who's number one?
Who's not here?
Who's having fun?
Who's the one
Who knows so much about you?

I believe, I believe
(Love's on your mind)
There's something more
I believe it's just beyond the door

(Come inside)
I believe there's something
Better out there
Wanna leave this world
So far behind
I can see your face there
In my mind
I believe there's something
Better somewhere

Who's that rushing?
Who's not taking?
Who's been down this?
You tell me who's
Who's not here?
Who's, Who's the one? Who?

Who's that rushing out the door?
Who's not taking any more?
Who's been down this road before
Without you?

I believe, I believe
(Love's on your mind)
There's something more
I believe it's just beyond the door
(Come inside)
I believe there's something
Better out there
Wanna leave this world
So far behind
I can see your face there
In my mind
I believe there's something
Better somewhere

Something better
(Something better, something better)
Something better
(Something better, something better)
