"Acid Rain"

Visit "[Acid Rain](#)" on MotoLyrics.com

Future is a mirror reflecting the past

Holocaust have been repeated day by day

Vital energy of the planet feeding the pacts of war

The smoke of burnt bodies spread through the air

The world agonizing in silence while exploitation goes
on

Living the present with feelings of nostalgia

The laws created by man contradicting the laws that
created man

As acid rain our faults falls over our heads

Cathedrals have been edified with fire for the new
bloody Masses...
