I got so much I want to say.
Still I don't know where to start.
Every time I see you,
every time I see your face you know you go and steal
my heart
I could love you in so many ways
I wish that
I could make you mine.
Ooh girl what I'm trying to say.
Maybe we can spend some time.

(Chorus:)

So please stay with me tonight.
Would you hold me close until the Morning?
Please stay with me tonight.
I need my angels good loving.
I wanna share the night with you.
I can hold you close until the morning.
We can Make love till that light come shining through.
From the dusk until the dawning.

We can make this moment last forever and build a
paradise for two.
A place where
I can be your one and only lover.
And the only one for me is you.
You can be my Angel help me fly away.
I can be you sunlight brighten up your day.
Can you feel
The magic every time we touch?
Please stay the night with me girl I need you so Much.
