A strange relationship has started
A strange relationship indeed
It's like a watercolour forming
Between the pages of a dream

And it's calling you
It's calling me
It's calling everyone to be

In a future world
With an Astrogirl
One on one is all you need

In a future world
With an Astrogirl
One on one is all you need

A strange experience has started
Between her molecules and me
It's like two seas
Between us forming
From obsolete technology

And it's calling you
It's calling me
It's calling everyone to be

In a future world
With an Astrogirl
One on one is all you need

In a future world
With an Astrogirl
The sky goes on and on for you and me
The sky goes on and on for you and me
The sky goes on and on for you and me

In a future world
With an Astrogirl
There'll be no obstacles, you'll see

Cos we'll be making friends with the supermen
The sky goes on and on for you and me
The sky goes on and on for you and me
The sky goes on and on for you and me
The sky goes on and on for you
The sky goes on and on

8 - Untitled

Will you be my lover?
Will you be the one?
Will you be like no other?
For how long?

And yes I'll be your wild flower
Grown through the concrete
And born to the backbeat of the stars

And yes I am just a stupid guy
Crushed like a butterfly
Deadeye at the drive by in a car

Like flies on a windscreen
Like insects in glue
We could stick together
If you wanted to

And yes I'll be your wild flower
Grown through the concrete streets
And born to the backbeat of the stars

And yes I am just a stupid guy
Crushed like a butterfly
Deadeye at the driveby in a car

Yeah just a stupid guy
Crushed like a butterfly
Deadeye at the driveby in a car
