I know that times are hard right now  
But every struggle has its phase.  
I know that people bring you down  
Save the trouble and just walk away.

And the sun will burn the clouds away  
And the sun will burn the clouds away.  
If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)  
If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)  
I know you feel like it's the end  
With every ending something begins (something  
begins)  
I know life seems so pointless  
But the point is for you to live

And the sun will burn the clouds away  
And the sun will burn the clouds away  
If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)  
If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)

Everyone has to wait for the rain,  
For the rain, for the rain. It's ok, It's ok.  
The sun will burn the clouds away  
The sun will burn the clouds away.

If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)  
If you wanna see the rainbow  
you gotta sit through a little rain (sit thru a little rain)

Sit through a little rain  
A little rain.  
Sit through a little rain  
A little rain.  
A little rain.
