(jill colucci/charlie black/austin roberts)  
(track 5 - time 3:46)

She gets in her car october friday night  
Home from work down 31 past franklin high  
She can see the stadium lights she can hear the band  
A thousand crazy high school kids screamin' in the  
stands  
Quarterback and homecoming queen  
Love to young to know what it means  
She goes back in time oh in her mind it's like a dream

He would be would sixteen  
The son she never knew  
It hurt so much to give him up  
But what else could she do  
He would be sixteen

A child should have a home she knows her folks were  
right  
She never heard the couple's name just that they were  
nice  
She wonders if he's taller than his father was  
Does he drive a car by now has he been in love  
She shakes back to reality she knows  
Things turn out the way they should be  
But she just can help but ask herself does he know  
about me

He would be would sixteen  
The son she never knew  
It hurt so much to give him up  
But what else could she do  
He would be sixteen

She never even got to hold him  
And nights like this hurts to miss  
The son she's never seen  
He would be sixteen  
He would be sixteen
