CHORUS

You say nothing yet I still hear
I am the thing that you most fear
I cause the pain deep in your heart
O, how I love to tear your world apart
Well I feel your pain and I survive
And I survive

I see your anger, I can hardly wait
How it feels so good to cause you such hate

Tried to ignore me. Thought I'd go away
But I'm back for good. I'm here to stay

CHORUS

You thought that you could get the best of me
To put me down, it seemed, so easily
I take such pride in the work I do
You hoped I'd fail but I'm not like you

CHORUS

I feel your pain so I survive
