Hey baby, you know I like what I see, Why don't you  
come to my room with me  
Staying here too long, Isn't right or wrong, But learn  
one thing from me  
You will find to see, everything you need, ss right here  
in front you, in me  
Party all night long, when you're home alone, Boozze  
and junk food nights, that's right

The expectations rise, your best friends arrive.  
I wonder when my girl gets here...  
Never had more alcohol than in my pool  
Never forget the third grade in high school

Vodka and GP, Mozart on tv, Crazy people dancing  
around me  
Standing on your feet, trying just to breath, people are  
getting close to me  
Making fun and jokes, everybody knows, there's only  
one thing that matters most  
Party all night long, when you're home alone, Boozze  
and junk food nights, that's right

The expectations rise, your best friends arrive.  
I wonder when my girl gets here...  
Never had more alcohol than in my pool  
Never forget the third grade in high school
