Written by: Joseph Deeb

Love is where I left it

When I walked out that door

Love is where I left it

And I wonder sometimes what for
People say I'm crazy

For leaving her alone at night

When the love we're making

Is brighter than all them lights
Chorus:

Girl it's you

You're the only one I want in my life

And it's true

You're the only one I want in the night
Oh, love is where I left it

When I'm rolling down the road

Going where they're paying

Turn around and bring it home
It's no way for living

But I can't find a finer mess

When it comes to dying

It'll probably hear my last breath
Girl, it's you

You're the only one I want in my life

And it's true
You're the only one I want in the night

Oh, love is where I left it
Bridge:

And when I rest

I pray the love that I left

Still waits there for me
I can hear the wind blow

I feel the trucks when they pass me

Staring through a window

She's all I ever see
It's no way for living

But I can't find a finer mess

When it comes to dying

It'll probably hear my last breath
Girl, it's you

You're the only one I want in my life

And it's true

You're the only one I want in the night

Yeah, it's you

You're the only one I want in my life

And it's true

You're the only one I want in the night

Oh, love is where I left it

Yeah, love is where I left it

Love is where I left it
