Written by: Willy Braun

Through the windshield tinted blue
I see the sun is going down, and I'm alone again
It's funny how life seems so real
When all I think about is loneliness in this state I'm in

CHORUS

Out here on the highway stars and AM set the mood
And just like all those movie road signs up ahead they
tell me
I'm a ways from home and a million miles from you

The way you left it gave no reason to believe
That we would ever have what we once had again
And the first thoughts on my mind as I climb aboard
My favorite release turned into the wind

And as the red fades into grey
This long black stretch of asphalt takes me away

CHORUS

Out here on the highway stars and AM set the mood
And just like a James Dean movie road signs up ahead
they tell me

I'm a ways from home a million miles from you
