## "Twilight Guardians"

Visit "[Twilight Guardians](#)" on MotoLyrics.com

Save us from distant life, that mindless civilisation

They appear through the darkest skies to take what we  
hold for all

When the fight and fury starts, we got no chance at all

Loosing in, out of control  
Please tell us what to do

TWILIGHT forever, we are the guardians  
TWILIGHT forever, we save the whole mankind!

Dark moon gliding up to the sky, enemy is closer again

Loosing it I dock to the ground

Please tell us when it ends

Raping the vallies of the world we are living in

Make you're self ready, it's time to go again

TWILIGHT forever, we are the guardians  
TWILIGHT forever, we save the whole mankind!

Father I have seen frozen eyes in my dreams  
All just standing still, waiting to be healed  
By the darkest kingdom, by the evil you are called  
Death waits for sacrifice, but we'll fight until we fall...
