You say you want distance from me,  
Well don't stand so close,  
Cos there's no where else that you'd rather be,  
Surrender Render to the facts that don't relate,  
I've seen the light and it guides me to the change  
change.

I did it all so you could be,  
Away away away,  
Away from me  
I need you to,  
Believe believe believe,  
Believe in me

You're like a car when there's ice on the road,  
Yeah out of control you suffocate me,  
So that I had no hope,  
And then some,  
Then some, I only laugh when I think of your face,  
I've seen the light and it guides me through change.

I don't think I was talking to you  
I don't think I don't think I don't  
I don't think I was talking to you,  
I don't think I don't think I don't think.
