"A Little More Alive"

Visit "[A Little More Alive](#)" on MotoLyrics.com

We talk a lot together
And think we'll talk so forever
Our differences are put under sedation

We share a light by which we see
Within our world of secrecy
Joined in an internal exploration

We are happy this way
Let our thoughts carry us away

I feel a little more alive
You and me we're drifting with the tide
I feel a little more alive
You and me we're drifting side by side

Of love we never spoke a word
Somehow it seemed just to absurd
To interfere with our imagination

We share a light by which we see
Within our world of lunacy
Joined in an internal exploration

We are happy this way
Let our thoughts carry us away

I feel a little more alive
You and me we're drifting with the tide
I feel a little more alive
You and me we're drifting side by side
