Your eyes captivate me
Embrace me with a smile
You never really cared, so stay a while
If you try to escape me, I'll beat your mind
I'll be crawling into you
Under the blue sky
Under the blue sky
Come closer, strong enough to try
I need you always, under the blue sky
Come closer, don't you ask me why
I need you always, Under the blue sky
Your moves fascinate me

I wonder what it's like
To feel you close beside me, To hold you tight
I watch you from a distance to catch your eyes
How they occupied my mind
Under the blue sky
Under the blue sky
Come closer, strong enough to try
I need you always, under the blue sky
Come closer, don't you ask me why
I need you always, Under the blue sky
Under the blue sky
