(Intro):

(Man feels good dot it)  
(Stress, Gotta lot of stress to get of my chest)  
Ahhh let me talk to you baby  
(You know,im thinkin sometimes i would talk i out)  
Ohh sit down.....  
(But it nver happened that way)  
(So i had to put it in my music)  
Now listen

(Chorus):

How do we fight(ahh)  
How do we argue(ahh)  
All Through the night  
When we should be pillow talkin baby  
Make the wrong drive  
All things aside  
Swallow our pride  
Ad jus love eachother all the time  
You got me and i got you  
What else could really matter but love.....  
An thats what its all about  
Till death does us part

(Verse 1):

Dear princess  
Remember what i called you  
Markin them calendar days away  
Till that moment i saw you  
And i fell in love from that very moment i saw you  
Glad i played on the phone and dial them numbers to  
call you  
Now im thinking about how could that go wrong  
You were so special to me like the music in this  
song  
from my heart  
I said till death do us apart  
Within dated for oy a month or so  
how is this possible

She, Shegot e stutterin  
My words begginin to slur  
As i say i love her  
But im lovin it  
It feels so right  
When im huggin her  
She sayin the same She feelin complete like 2 way  
street  
Ringing my phone, She never hear a beep  
That, means im answering  
Fufillin your every need and desire  
Your dream, this is life with me  
Continuing shoppin spree's  
When im on the road  
Even gave you all the security codes  
So baby tell me, tell me

(Chorus):

How do we fight(ahh)  
How do we argue(ahh)  
All Through the night  
When we should be pillow talkin baby  
Make the wrong drive  
All things aside

Swallow our pride  
Ad jus love eachother all the time  
You got me and i got you  
What else could really matter but love.....  
An thats what its all about  
Till death does us part

(Verse 2):

I thought there was more to what we had  
Our secret stash  
Filled with bundeled of emotions  
Now im startin to notice  
Ahh that shit was bogus  
Ahh the deserted roses  
Thinkin you was my golden token  
Now im feelin frozen  
Looking like my life is hopeless  
No human, Shall ever experience  
What i drove in  
Now my car is broken  
My engine hood, I should have never left it open  
Lookin like im on E, No fuel, I cant even eat  
Dont even wanna breath if you aint close to me  
No friends

My only enemy is cupid  
How could you be so stupid  
Please tell me why love hurts  
Can you even hear me  
Can you even imagine if your arrow  
Wasnt workin for weeks  
I dont think so  
Im just trynna think slow  
And just "hey" me  
So please play the drumrole  
And role the red carpets out  
As a way for you to return  
With an explanation  
So baby start explainin(Start explainin)

(Chorus):

How do we fight(ahh)  
How do we argue(ahh)  
All Through the night  
When we should be pillow talkin baby  
Make the wrong drive  
All things aside  
Swallow our pride  
Ad jus love eachother all the time  
You got me and i got you  
What else could really matter but love.....  
An thats what its all about  
Till death does us part

(Outro):

Haha i hope you heard the whole song  
It was from me to you  
Something special  
Im lovin this music  
But i wish you was here with me  
To love it to  
But it looks like we went our seprate ways  
So maybe another day
