Flames of the free, just come and take me  
After I burn it will be your turn

Ancient tales tell how life began in the ice and flames  
of the old world  
Burning  
Recent times tell of trial and error, the reign of terror  
will soon be  
Turning

Cages of fear that the future holds nothing but our  
dismal past with a  
Vengeance

Flames of the free, just come and take me  
Out of deep desperation  
After I burn it will be your turn  
For the good of our nation  
Flames of the free, just come and take me  
Let me fall in the fire  
After I burn it will be your turn  
To be cast on the pyre

Worn out is your welcome when subjects would rather  
fry than linger  
In a world of this heedless hunger desire for freedom  
grows only stronger

Burning is better when men have been utterly bereft of  
hope in the future

Flames of the free, just come and take me  
Out of deep desperation  
After I burn it will be your turn  
For the good of our nation  
Flames of the free, just come and take me  
Let me fall in the fire  
After I burn it will be your turn  
To be cast on the pyre
