Late at night if you're lonely, girl  
Love is overdue  
The tiredness of a broken heart  
Has cast its shadow on you

You're so tired of flirting  
You want a love that's certain  
You want a love that will last

Getting out harmful  
From this accelerated romance  
And I'll give love to you fast

I'll be your knight in shining amour  
When you call my name I'll come to ease the pain  
I'll ride the night like a black stallion, baby  
I'll be bearing the torch to ignite your flames

'Cause I'm a night rider, I'm a love provider  
Night rider, I'll come for you in the night  
Night rider, I'm gonna take you higher  
Night rider

It's cold and you're shivering, baby  
Nobody knows why you weep  
The night is still too [Incomprehensible]  
Honey, it don't let you sleep, no no no

I've come to comfort you, now  
Yeah, I'm sure, I know how  
To satisfy your needs

I've got my engine running  
Oh no, girl, I'm coming  
To make your night complete

I'll be your knight in shining amour  
When you call my name I'll come to ease the pain  
I'll ride the night like a black stallion, baby  
I'll be bearing the torch to ignite your flames

'Cause I'm a night rider, I'm a love provider

Night rider, I'll come for you in the night  
Night rider, I'm gonna take you higher  
Night rider, no one else can make you feel alright

Night rider, I'm a love provider  
Night rider, I will come for you in the night  
Night rider, I'm gonna take you higher  
Night rider, ooh baby, please

Night rider, let me take it to the max, baby  
Night rider, oh baby  
Night rider, I will ride you through the night  
Night rider, baby, let me, let me

I'll be your knight in shining amour  
When you call my name I'll come to ease the pain  
I'll ride the night like a black stallion, baby  
I'll be bearing the torch to ignite your flames

'Cause I'm a night rider, I'm a love provider  
Night rider, I'll come for you in the night  
Night rider, let me take you higher  
Night rider, let me take it to the max, baby

Night rider, I'm a love provider  
Night rider, let me take it high, baby  
Night rider, let me do, do, let me get to you  
Night rider, let me do, do, let me get to you  
Night rider, let me do, do, let me get to you  
Night rider, let me take it, baby
