I could say that it's time, to let you go  
I could say that, I'm moving on  
Eighteen years was all I had to hold against my heart

I don't know if I can touch you, or if you're outta reach  
I don't know if I can see you, even if I get to leave  
I don't know if I'm on fire, or if you're made of sparks  
I don't know if I'm that secret, that you'd never want to  
part with...

I don't know if I can touch you, or if you're outta reach  
I don't know if I can see you, even if I get to leave  
I don't know if I'm on fire, or if you're made of sparks  
I don't know if I'm that secret, that you'd never want to  
part, with...

Cos I just wanna fly, I just wanna take you by the hand,  
Take you for a drive, show you how our life will never  
end

I just wanna fall, it's time for us, it's time to let us in...  
I just wanna fall, it's time for us, it's time to let us in...  
I just wanna fall, it's time for us, it's time to let us in...  
I just wanna fall, it's time for us, woah...
