Keep the doors open  
There may be more than I thought before  
Looking to the future  
For what's in store  
I know just what will make her stay  
And if things really go my way  
I'll be looking to the future  
For what's in store  
Hey lady what's in your brain  
Hey baby I feel the same

So long so long so long I tried  
To break it down to you  
Emotions that I cannot hide  
Intentions so true  
Rain clouds keep forming up  
But the sun keeps shining thru  
Every thought that I have now I said is because of you  
Keep the Doors Open
