"Let It Flow"

Visit "[Let It Flow](#)" on MotoLyrics.com

Open up a bag of 20/20 vision then I close my eyes.
The animation of my senses helps me see your image
in the sky

We can feel the pleasures of the grain if you want to
come in from the rain

Drifting through an open womb of colors that just
makes me want to sleep
Awakening and much to my surprise you're there and
lying next to me

We can hear the song the ocean sings, holy water
baptize me from sin

I'm letting go, let it flow, we can be high again
Just let it go, feel the flow, a journey that never ends

Invitation to ride a shining star tonight, take my hand
and we can fly away
Celebration of this moment, of this life, there will be a
better way

We can fly away (fly away)
I'll take you to a place so far away

Invitation to ride a shining star tonight, take my hand
and we can fly away
Celebration of this moment, of this life, there will be a
better way
