### "Beautiful One"

Visit "[Beautiful One](#)" on [MotoLyrics.com](http://MotoLyrics.com)

i love it when you scrunch your eyes  
i love it when i hold you tight  
i love it when you kiss me slow  
i love the freckles on your nose  
i hate it when you fall asleep  
and i hate it when you don't talk to me  
i hate when you say goodnight  
i hate that i pick a fight  
when i think of all i do and smile  
cos you are mine, cos you are mine

i wanna be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you  
can i love you  
wanna love you, can i love you  
and be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you  
can i love you  
wanna love you, oh beautiful one

(?)  
but i can always be your shining knight  
i might be the hardest to like  
but i hope you don't change your mind  
yeah i get a little jealous  
and i know that's not good  
but if you had someone like you  
you would do, you would do  
when i think of all i do and smile  
cos you are mine, cos you are mine

i wanna be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you  
can i love you  
wanna love you, can i love you  
and be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you

can i love you  
wanna love you, oh beautiful one

i'ma love you when the money is down  
and i'ma love you when you put on some pounds  
i'ma love you when time takes away all the beauty in  
your eyes today  
i'ma love you when you can't remember  
i'ma love you when we lose forever  
i'ma love you even more tomorrow  
but for now i'ma love you today

i wanna be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you  
can i love you  
wanna love you, can i love you  
and be everything you are  
i wanna be the one that starts your heart  
i wanna be there, wanna wanna love you  
can i love you  
wanna love you, oh beautiful one
