How did you get here
When and where did he come from
Girl I don't even care anymore
All that I know is I'm never gonna let you go.

Chorus

I can't remeber life before you
And I can't imagine life without you
And I wouldn't want a life after you
There's no you I don't have any
Reason to live at all

Since you've walked in my life
The warmth from your heart brought my love alive
And I know that I will never love this way again
I hope and I pray
That this feeling never goes away

Chorus

You stole my heart the day I laid my eyes on your face
And your love does something special to me
No one else has ever moved me quite like you do
My heart belongs to you Chorus
