Nothing can make this easier
So secretly I'll put two fingers to my head

Your victim is here
End this now, bring this love down (end this now)
Bring this love down
I'll manage myself

Nothing can make this easier
So secretly I'll put two fingers to my head

I look at you and walk away
I'm leaving my heart (I'm leaving my heart)
Getting out of this deadly silence
Getting out of this deadly silence

I will never forgive you
There was to many mistakes

You see these scars on my heart?
I can't belive I bled for you!
You see these scars on my heart?
I can't belive I bled for you!

This is the end
This is the end
This is the end
This is the end

Look what you've done to me
Look what you've done to me

You see these scars
On my heart
I can't belive I bled for you
You see these scars
On my heart
I can't belive I bled for you
