Our fear is bombs , our fear is war
Uranium blasting, it's time to disarm
Will we make it to the 21st century?
Will the fear exist for eternity?

---fear of the light---

Well you lead us into the atomic age now
Will you lead us away from the carnage now?
Or will hydrogen take us to the final stage now?

Our fear is bombs , our fear is war
Uranium blasting, it's time to disarm
Will we make it to the 21st century?
The fear exists of nuclear energy

---fear of the light---

Well you lead us into the atomic age now
Will you lead us away from the carnage now?
Or will hydrogen take us to the final stage now?

Take us to the final stage....
