

## Usher "Something Special"

Visit "[Something Special](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Oh, yeah, yeah, yeah  
Yeah, yeah, yeah, yeah  
This one's for the lovers, follow me

Clearly this is new for me  
I get excited when you're here, my dear  
Make no mistake you are all I see, sugar  
My vision's never been so clear

We both know that I've been running so long  
This time love won't let me leave  
Please be patient, hesitation aside  
We're almost where we need to be

But in the mean time let me say what's on my mind  
Baby, I, I think we've got something special  
Girl, you and me together we'll take over the world  
You know I love you, I need you so  
So happy, I just want to let everybody know

Think back to the time when I was scared to let it show  
Having too much fun with this and that or what  
Now, that you're mine  
Somewhere along the way everything fell in place

I'm so proud of how you represent me, baby  
Whether rockin' Armani, Dolce&Gabbana;  
Roberto Cavalli, Louis or Gucci, girl  
No matter what you wear, you do your own with it  
I feel the same years from year

But in the mean time let me say what's on my mind, oh  
Listen, I think we've got something special  
Girl, you and me, together we'll take over the world  
You know I love you, I need you so  
So happy, I just want to let everybody know

That I think we've got something special  
Girl, you and me, together we'll take over the world  
You know I love you, I need you so  
So happy, I just want to let everybody know

You know I need you, baby  
(I love you)  
You know I do, I need you, baby  
You know I do, I need you, baby  
You know I do, I need you, baby

Now, that you're mine  
Somewhere along the way everything fell in place

Hey, hey, I think we got something special  
Girl, you and me, together we'll take over the world  
You know I love you, I need you so  
So happy, I just want to let everybody know

I think we've got something special  
Girl, you and me, together we'll take over the world  
You know I love you, girl, I need you so  
I'll never, never let you go, no  
You're so special
