First time
I saw you baby
You did
Something to me
That no one else
Has ever done
(Ooh)
Something in you eyes
Caught me by surprise
And told me
That you are the one
(Oooh)
But what's that
It's another man, a guy
He'll never understand
The chemistry
Between me and you
(Oow, baby)
Something inside of me
Is saying you and I
Are ment to be
If you can think it
You can have it
That's why I believe

One day you'll be mine
(Mine)
No more creepin
Sleepin around
No whispering
When He's around
One day you'll be mine
(Mine)
No more creepin
Sleepin around
No wishpering
When he's around

Noe every time
I see you baby
It's plain to see
That I'm everything

You've been missing
At home ey
(Hooooow)
So much love to share
It's something in the air
Telling me
I should never
Leave you alone
But even though
I know you got a man
He'll never understand
The chemistry
Between me and you
(Oh, baby)
You can try to stop it
But it wont quit
You say you don't
When I know
That you want it
I know
One day you'll be mine

One day you'll be mine
(Mine)
No more creepin
Sleepin around
No whispering
When he's around
One day you'll be mine
(Mine)
No more creepin
Sleepin around
No whispering
When he's around
