[Chorus]

Let's dance the night away
And get lost up in the moment
We can ride this wave
Together we'll be floating
Prepare to fly away
Don't look down it is something like a dream
And I'm the realest thing
When we're riding on these wings

Breath taker, what's your rise up anxious
Here we are, so why you hesitating
Afraid of heights, no, no, no that can't be
You're in good hands, so just relax because

[Bridge]

This is your captain, we're predicting clear skies
We just ask that you strap in
Hold on tight, close your eyes
It's smooth sailing, we'll reach our destination, cloud 9
Just open up my eyes

[Chorus]

Let's dance the night away
And get lost up in the moment
We can ride this wave
Together we'll be floating
Prepare to fly away

When we're riding on these wings

You're my guest, as such I'll take the upmost care
All the rest, girl pretend that they're not even there
Second thoughts, no, no, no that can't be
Take my hand, and just relax, because
