Magick shrouded in secrecy
Spells of evil sorcery
Poison from amphibian
Human remains, reptilian tongue

Formulas to stop your heart
And eradicate your soul
I will raise you from the ground
Strengthened by the Python God

Awake the dead
Souls are drained
To speak my name, you speak in vein
Fires rise to seal your doom
Hades now has no more room

Formulas to stop your heart
And eradicate your soul
I will raise you from the ground
Strengthened by the Python God

Subhuman, undead, immortal, profane
Unholy cursing bestowed on your name
Voodoo, black magick, forever enslaved
I will command you to raise from your grave

DEATHWISH!

Potions transform you/a hypnotic state
Ritual murder, a zombified fate
I am your god/master divine
You are my servant unmortified swine

DEATHWISH!

Formulas to stop your heart
And eradicate your soul
I will raise you from the ground
Strengthened by the Python God
