what you've got in your head for me
is it all in your head or is it coming from your body
what you've got in your head for me
is it all in your head or is it coming from your body
so won't you close your eyes boy and tell me
tell me what you've got to say
and you can take your time boy
but dont show me what you've got
i just want to hear what you've got to say

so won't you keep your pants on and open up
open up that useful mouth
and you can put your hands down
i dont want those things on me
i just want it coming from your mouth

what you've got in your head for me
is it all in your head or is it coming from your body
what you've got in your head for me
is it all in your head or is it coming from your body
let's take it a little further and baby
you can speak your mind
oh so he tells me what i should be, could be
if i play my cards right

oh, so give me what you've got cause i can take it
adjust me with your words, your words, cause i am naked
and give me what you've got cause i can take it
adjust me with your words, your words, cause i am naked

so what you've got in your head for me
is it all in your head or is it coming from your body
what you've got in your head for me
is it all in your head or is it coming from your body
