Deep in the city where love is dead  
In the shroud of the mist of sulfur and lead  
A necropolis where the lights are red  
Where hope is found broken and dead

I found you  
I found you

Your first love has forgotten your name  
And now you're playing a different game  
A metropolis of cardboard and cans  
The universe fell from your hands

I found you  
I found you  
I found you  
I found you

On a river of light you came to the night  
With innocent eyes that burned so bright  
Looking for love and to be rich  
But now you know that life's a bitch

I found you  
I found you

The face in the mirror is no longer you  
It's a ghost from Hell looking back at you  
In the violence there you are consumed  
In the violence there you are truly doomed

I found you  
I found you  
I found you  
I found you

In the eye of the vortex you were alone  
In the eye of the vortex of skin and bone  
At the gate to the portal I'm here with the key  
At the gate of the portal to set you free

I found you

I found you  
I found you  
I found you

I found you  
I found you  
I found you  
I found you

I found you
