'Take it or leave it', I've heard it been said
All this spring fevers just way over my head
Stealin' my moments, takin' up all my time
It's playin' Russian roulette with my mind

None of my business baby just what's goin' on
I'm not goin' to wait till somebody throw me a bone
I'm way out on a limb now and nothin' seems to rhyme
It's playin' Russian roulette with my mind

I think that you've caught on, that you've been used
and all
I'm goin' down new Orleans, I've got to see Dr. John
Got my mojo workin' everything will be fine
Stop playin' Russian roulette with my mind

It's not easy baby when everything starts gettin' out of
control
Hang up to your hat now, hang on to your soul
Don't worry baby, I wanna throw you the line

They're playin' Russian roulette with your mind

Too many hustlers and I've been here before
None of them really know just who that you are
Everything gets contracted and space gets confined
They're playing Russian roulette with your mind

They're playin' Russian roulette
They're playin' Russian roulette
They're playin' Russian roulette with your mind

They're playin' Russian roulette
They're playin' Russian roulette
They're playin' Russian roulette with your mind
