Love child loves American style
In her own sweet way
Love child will drive you wild
With the game she plays

Watch out or trouble's gonna find you
Watch out her beauty's gonna blind you
She's gonna break your heart
She's gonna make you Love her
And you'll be torn apart
She's gonna make you love her, yeah

Love child, she came and changed your life
And now you'll never be the same
Love child she came and changed your life
And now you're caught up in her game

Love child, Mona Lisa smile
Stranger than a summer snow
Love child will drive you wild
Then she'll get up and go

Watch out or trouble's gonna get you
If you go about your strange ways
Watch out, better slow it down
These are only games she plays

She's gonna break your heart
She's gonna make you Love her
And you'll be torn apart
She's gonna make you love her, yeah
