I just wanna tell you something
I love you
so much
and I will never forget you my life

I hold my pillow real tight
I'll try to sleep for a while
so I just close my eyes
cause I wanna dream of you tonight
your the friend I ever had
helpin' me trough the good and bad
you are the wind between my wings
simply the best

That's the way love is
It can make you laugh and cry
That's the way love is
It can feel so good inside
That's the way love is
It can makes you go insane
That's the way love is
it can makes you change your life (can change your
life)

Oh you gave me love (you gave me love)
and you gave me joy
you were there trough the better and worst
when I needed a friend
because of all we had been through
our love would always be true
you're the wind between my wings
simply the best

That's the way love is
It can make you laugh and cry
That's the way love is
It can feel so good inside
That's the way love is
It can makes you go insane
That's the way love is
it can makes you change your life (can make you

change your life)

Come into my life
step into my world
show me how you feel with every lovin' word
Come into my life
step into my world
show me how you feel with every livin' word
How can I express
the feelings in my heart
for you there are no words
just loving every part
you're the wind (you're the wind) between my wings
simply the best

That's the way love is
It can make you laugh and cry
That's the way love is
It can feel so good inside
That's the way love is
It can makes you go insane
That's the way love is
it can makes you change your life
