"From Nowhere"

Visit "[From Nowhere](#)" on MotoLyrics.com

tell me how you end the story,
tell me how you managed to throw it away,
who's the one that you can trust in,
who's the one that you can never forget,
find the way to talk about it,
find the way to put it out of my head.
i was living life in pictures
all my memories never seem to change

and she came all the way from nowhere
and she came all the way from nowhere

you've been trying to make me sorry
you've been trying to hide your feelings away
who's the one that you can trust on
who's the one that you can never forget

and she came all the way from nowhere
and she came all the way from nowhere

getting tired of all this places
getting tired of all this...
