Let's go!

Forget everything  
Let's get out of this place  
Let's cross different lines  
Let's find a new face  
On different roads  
Into different homes  
Stand shoulder to shoulder so  
We're not all alone.

Head for the hills  
We've got miles to go  
And there's nowhere to run to  
Nowhere to run to  
This city's ruined  
There's no one left here  
I'll be gone for now.

Forget everything  
Get out of this place  
Let's leave this behind  
Go find a new face.

I hope that all this finds you  
When your run comes to an end  
With new beginnings  
Different endings you'll find yourself  
All alone.

Head for the hills  
We've got miles to go  
And there's nowhere to run to  
Nowhere to run to  
This city's ruined  
There's no one left here  
I'll be gone for now.

You are miles away  
And I can't hold myself back  
Can't hold myself back

You are miles away  
And there's no way to reach you  
No way to reach you. (We've got miles and miles to go!)

Head for the hills  
We've got miles to go (miles to go!)  
And there's nowhere to run to  
Nowhere to run to  
This city's ruined  
There's no one left here  
I'll be gone for now.

Head for the hills (Head for the hills)  
We've got miles to go (miles to go)  
And there's nowhere to run to  
Nowhere to run to  
This city's ruined  
There's no one left here  
I'll be gone for now.

I'll be gone for now.
