You're the only chance we've got now
You quit this band
I'll burn your house down
Isn't that a familiar sound?
An empty voice with no solid ground

I refuse to believe that
This is only just a phase
To all my friends who left me
You weren't fit for this anyway

I've seen them come and go
Like this weeks trend
You'll be (what we left behind)

Oh, I dug this grave for so many years
Oh, can't wait to get out of here
Get out of here

Hold your breath
You're only sinking deeper
Now that you cut the ties
(We'll cut!) we'll cut the ties

And all of us will
Finish what you started
Now that you let us down
You've let me down

Oh, I dug this grave for so many years
Oh, can't wait to get out of here
Oh, I've felt this way for so many years
Oh, can't wait until we get out!

You're just (you're just)
What we left behind
You're just (you're just)
What we left behind
