Can you brush this dust away for long?
A stain on the face of everything done wrong
Just close your eyes
Accelerate
Eyes on the prize
Accelerate

Don't look behind you
There's another one as powerful
Don't look behind you
There's another one
Expendable
Don't look behind you
Gotta keep on running, run til your lungs burn
Cause they're coming for you

Drink from the essence of the serpentine
Fear shot away as you begin to climb
Just close your eyes
Accelerate
To serve your side
Accelerate

Don't look behind you
There's another one as powerful
Don't look behind you
There's another one
Expendable
Don't look behind you
Gotta keep on running, run til your lungs burn
Cause they're coming for you

I'm on top of it
Gonna start a riot
Look what's up, you made it through the rain alone
Defy divine
Look up, you made it through the rain alone
Your suicide
