Fighting soldiers running wild  
To salute their Lord  
Make a sacrifice tonight, kill men from abroad  
They can't escape, there's no place to run  
Stupid methods, fear of death,  
'Til the battle's done  
The President has said to 'em:  
"The enemy is near!  
Kill'em all, defend your country,  
March out without fear!"  
Despotism at it's best, see the fuckin' slaves  
Detonation, chaos, death, digging  
Their own graves  
Die in hell  
Good men on the one side,  
Good are the others, too  
Got the order: "kill each other, that's what you must  
do!"  
Disarmament, deitente, peace -  
Promises, not more  
Reality are fightin' soldiers dying in this war  
Die in hell  
Stop these politicians, for they create the war  
They're the men, you have to fight against 'em  
There's no law  
Strike down this madness, soldier take revenge!  
Take your destiny in hand, it's you must defend!  
Die in hell.
